# GIN IS IN FASHION

After a time out of the limelight, gin is bouncing back with a vengeance. Gin is in popular demand, and in particular since the new millennium, many modern gin distilleries have sprung up on a global scale. Distilled in small scale stills, using an intriguing range of innovative flavours.

All gins include juniper berries as an ingredient. They have been lending their subtle bittersweet aroma since the 17th Century.

Heather is part of the Highland landscape, now it is foraged for its botanical properties. With its subtle perfumed undertones with a nuance of honey it is an integral part of Scottish gins.

Juniper no longer reigns supreme in the 'New Western Style Gins'. Master distillers select other flavours to rival or compliment the juniper berry.

The gin universe was never so full of variety or characterised by such ingenuity as it is today. This new wave of premium gins in their stylish bottles are taking over. That's a good enough reason to take a closer look at some of these gins.

We are pleased to offer you some outstanding representatives of this new age, along with a few old favourites.

We hope you enjoy browsing, and decide to try a Gin from our selection - cheers!
